

## Pattern for Error Message

Copyright © 2017 Chandra Lingam

Write a pattern to capture error message.

Time stamp should be captured in the named group **ts**

Error message should be captured in the named group **error**

An example is given here

```
-----  
ROBOCOPY      ::      Robust File Copy for Windows  
-----  
  
Started : Saturday, May 28, 2016 7:24:30 PM  
  
Source : C:\RegularExpressionsWithDotNet\robocopytest\source2\  
    Dest : C:\RegularExpressionsWithDotNet\robocopytest\destn\  
    Files : *.*  
  
Options : *.* /BYTES /S /DCOPY:DA /COPY:DAT /NP /R:1000000 /W:30  
-----  
  
2016/05/28 19:24:30 ERROR 2 (0x00000002) Accessing Source Directory C:\RegularExpressions  
WithDotNet\robocopytest\source2\  
  
The system cannot find the file specified.
```

With the above text, pattern should return a match with named groups:

**ts:**2016/05/28 19:24:30

**error:** 2 (0x00000002) Accessing Source Directory  
C:\RegularExpressionsWithDotNet\robocopytest\source2\
