

Exercise: Network Configuration Parser

Copyright © 2017 Chandra Lingam

Here is one pattern that you use for parsing the network configuration data:

```
(?im)interface(?P<interface>.+)\s+vrf(?P<vrf>.+)\s+ip\s+address[^\d]+(?P<ip>.+)\s*(?:ip\s+address[^\d]+(?P<ip2>.+)\s*)?"
```
